## Introduction

---

In the mid-1990s the California Department of Alcohol and Drug Programs (ADP), in collaboration with the EMT Group, Inc., began work on improving the state's prevention information systems. A primary goal of this effort was to develop a management information system for consistently and uniformly documenting a) levels of needs for state substance abuse prevention programming b) the nature and extent of program efforts in prevention implemented throughout the state, and c) the effectiveness of these prevention efforts in obtaining intended outcomes.

A key component of this information system was the continuous collection, monitoring, and reporting of selected community-level indicators that would serve as direct and indirect measures of alcohol and other drug use prevalence and related problems. This information system was designed to assist with statewide prevention planning and policy-making by providing useful, systematic data about prevention needs and related conditions throughout the state.

The present report is a product of this ongoing effort. Prepared by the EMT Group, Inc. with ADP funding administered through the University of California, San Francisco, Center for Substance Abuse Policy Research, its purpose is to provide timely, relevant information on the status of alcohol and other drug use problems in California in order to facilitate planning and monitoring of prevention outcomes. Specifically, the report may serve as a tool for planners, policy-makers, and practitioners in the field in their efforts to:

- Determine the prevalence of a problem in the community;
- Identify patterns of need for services;
- Forecast service needs;
- Establish appropriate program resource levels;
- Understand environmental influences in the community; and
- Determine whether intended social change is occurring

The report compiles data on 26 community indicators, including measures of risk factors associated with alcohol and other drug use, measures of overall substance use prevalence, and measures of the consequences associated with problem use. Each indicator and its population-based rate is reported in six-year trends with state and county-level comparisons to allow for monitoring of changes in problem status over time and across geographic area.

## Introduction (continued)...

---

### ***How is the information collected?***

The information contained in the report was gathered from public records that are maintained and disseminated by eight major state agencies (“archival data”). This reliance on state level data sources ensures that the information reported is uniform across counties and over time (i.e., all counties use the same data collection procedures), and allows for reliable comparisons between counties and the state, and among counties with similar demographic characteristics (“like-counties”). Each agency source contributing to the report is listed in Table I.1.

<p><b>Table I.1</b> <i>California Alcohol Beverage Control</i> <i>California Department of Alcohol &amp; Drug Programs</i> <i>California Department of Education</i> <i>California Department of Health Services</i> <i>California Highway Patrol</i> <i>California Department of Finance</i> <i>California Department of Justice</i> <i>California Department of Social Services</i></p>
---

### ***How were the indicators selected?***

The twenty-six indicators contained in the report were selected based on several key criteria, including:

- Validity: How well does the information measure what it is supposed to measure?
- Reliability: Is the data collected in a consistent manner from year-to-year?
- Availability: Is the information accessible in a timely and useable format?
- Appropriateness and relevance: Does the indicator measure risks or outcomes that have an established theoretical or empirical relationship to substance use and related problems?

As the risk and outcome information system continues to evolve and as new and more sophisticated measures become available, the set of indicators may be expanded or modified, and new selection criteria may be added.

### ***How are the indicators organized?***

The organization of the report is based on a framework of alcohol and drug abuse risk and protective factors developed by Hawkins and Catalano through their ongoing work in the prevention research field. This framework identifies four major domains of risk for substance abuse and related problems, including:

- 
- **Community factors**, such as the availability of substances, community laws and norms favorable to use, extreme economic deprivation, high rates of transition and mobility and social disorganization;
  - **Family factors**, such as family history of substance abuse, poor family management practices, parental drug use and favorable attitudes towards drug use, and family conflict;
  - **School factors**, such as academic failure, low commitment to school , school-related problem behaviors;
  - **Individual and peer factors**, such as peer rejection, early and persistent problem behavior, alienation and rebelliousness, friends who use drugs, favorable attitudes toward drug use, and early initiation of drug use.

In addition to the four broad domains, indicators are further classified into subdomains which group measures that are conceptually linked within the same broad domain area. Together, these domains and subdomains provide a logical basis for organizing indicators as they relate to differing prevention strategies and outcomes.

### ***How is the information presented?***

The report is designed to serve as a simple, easy-to-use resource for understanding and interpreting community-level data on substance use in California. To facilitate its use, the document contains several basic analytic techniques to assist with data interpretation.

First, in order to make meaningful comparisons between geographic areas that differ in population size, or comparisons between differing time points, each raw indicator has been converted into a population-based rate that describes the event in relation to a standard population size, such as the number of occurrences for every 1,000 people residing in the state or in a given county. Rates are calculated as the number of events divided by the total population size, then multiplied by the population standard (e.g., 1,000). Although rates are intended to facilitate interpretation, it should be noted that in cases where an indicator measures a relatively rare event (e.g., deaths due to alcohol and drug use) rates may be unstable, or prone to wide fluctuations from year to year, particularly when applied to relatively small populations. For this reason, rates measuring rare events or rates for counties with very small population size should be interpreted with caution.

Also for comparative purposes, data is presented at both the county and state level to allow county rates to be evaluated against a relative average. Each indicator is also compared to a three-year average rate for a subset of counties that are considered to be similar in demographic characteristics to the county under consideration (see Appendix A for groupings of “like-counties”). Characteristics that contribute to the classification of “like-counties” include the relative size of the youth population, race/ethnic distribution, poverty status, and proportion of the population living in urban or rural settings.

## Introduction (continued)...

---

For each indicator, counties are also ranked in ascending order based on an average of their three most current years of data. A low rank (e.g., 4<sup>th</sup> of 58) indicates that the county rate is low relative to other counties in the state and thus, that the population has a low relative level of substance use risk for that indicator.

Throughout the report, information is presented for three to six years of data depending on the availability of the indicator. For those indicators with six complete years of information, the trend in rates over time has been analyzed using a simple correlation to determine both the direction of the trend and whether the trend is statistically meaningful (i.e., whether a true relationship exists between time in years and the value of the rate). Trends found to be significant are labeled as increasing or declining, while those that show no statistical importance are considered “undetermined” trends.

In addition to presenting data at the indicator level, individual measures have been mathematically combined into a standardized composite score measuring overall alcohol and other drug abuse risk. To calculate the composite score, individual indicators were first converted into standardized rates (also known as z-scores) that measure the relative deviation of the county rate from the statewide average. For example, a standardized score of .75 would indicate that the county’s absolute rate (e.g., 14.8 arrests per 1,000 population) would fall .75 standard deviations above the state average, while a standardized rate of -.75 would fall .75 deviations below the statewide mean. Once rates have been standardized to a common scale, they are averaged to create an aggregate measure of total alcohol and other drug risk.

Collectively, these analytic tools will help translate statistical observations and data into a “real world” profile of community conditions related to alcohol and other drug use.

### ***How is the report organized?***

The body of the report is organized into three major sections. The first section presents information on overall alcohol and drug abuse risk as measured by the standardized composite score. The second section presents county-level data for each of the twenty-six indicators, organized according to the four major domain areas. The reports concludes with a section presenting state and county level comparative data , including geographic depictions of three-year average rates for all counties in California.

Statewide Ranking	7th

Table AD.3  
Yearly Composite Rates for Subdomains  
1994-1999

	1994	1995	1996	1997	1998	1999
Community	-.02	.08	.05	.14	.1	-.37
Family	-.83	-.79	-.88	-.83	-1.07	-1.1
School	-.3	-1.65	-1.12	-.68	-.48	-.77
Individual	-.36	-.18	-.38	-.56	-.4	-.4

### Standardizing Rates

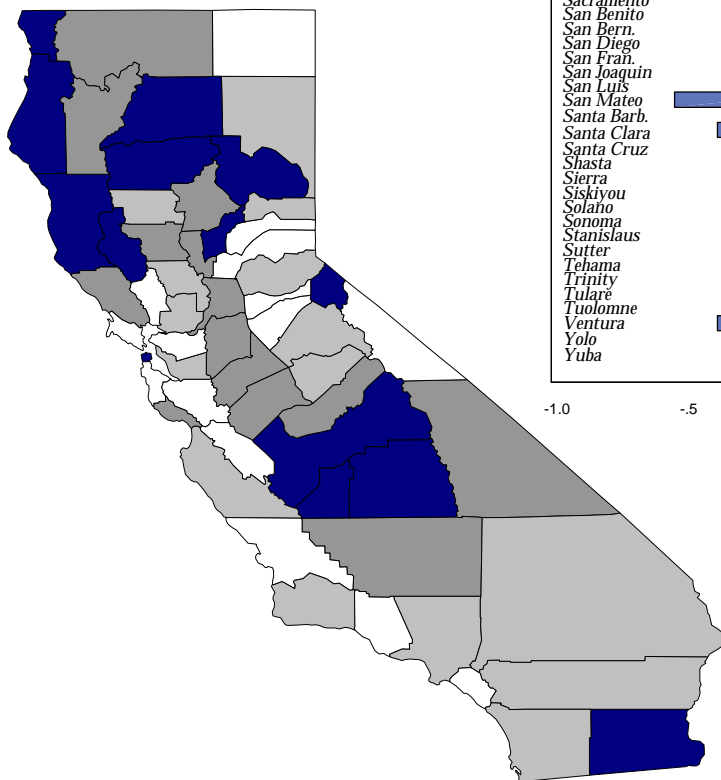

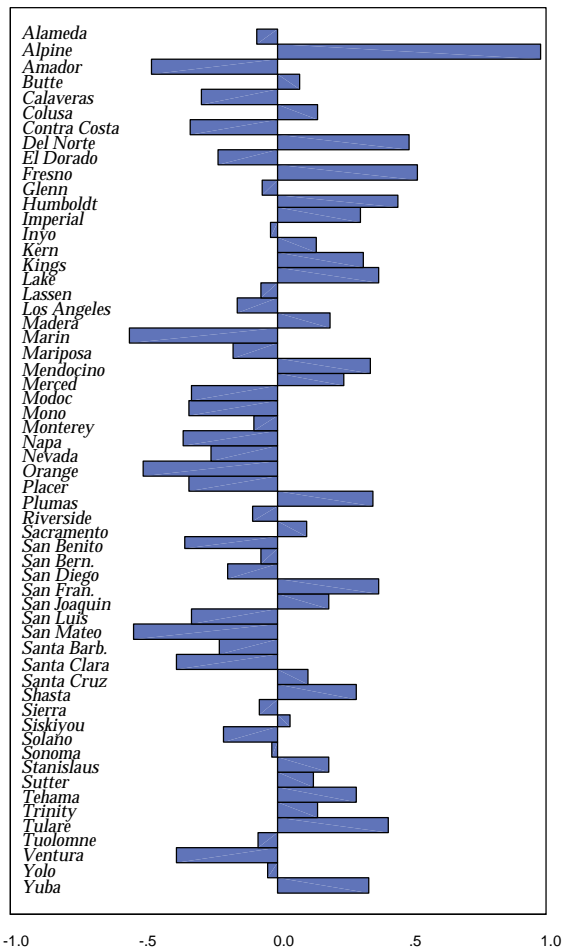

The composite score of alcohol and drug risk is calculated by standardizing each of the indicator rates to a common scale (z-score) based on a mathematical calculation of the standard deviation. This common scale allows indicators to be combined, through averaging, into a single measure of substance use risk that may be compared across county and over time.

California	7.8	6.5	5.2	6.2	6.1	5.1

**Source:**  
CA Department of Finance,  
Demographic Research Unit

### Data Notes & Limitations

The legal foreign immigration rate does not include undocumented aliens, refugees seeking asylum who are waiting for approval of applications, or non-legal aliens approved for temporary residence.

The number of immigrants per county is based on intended destination of residence.

## Reported Crimes

Indicator 1.4

Table 1.4.1  
**Reported Crimes and Rate per 1,000 Population**

	1994	1995	1996	1997	1998	1999
Total Crimes	5097	4549	3985	4255	4062	3058
Total Population	119,000	117,800	119,000	121,200	122,600	124,200
Rate per 1,000	42.8	38.6	33.5	35.1	33.1	24.6

California	42.8
County Cluster Urban "C"	35.0
Statewide Ranking	16th

Table 1.4.3  
**Annual State & County Comparisons  
1994-1999**

	1994	1995	1996	1997	1998	1999
Napa	42.8	38.6	33.5	35.1	33.1	24.6
California	61.0	58.0	51.7	48.1	42.8	37.5

**Source:**  
CA Department of Justice,  
Criminal Justice Statistics Center

### Data Notes & Limitations

The crime rate documents the incidence of selected offenses including homicide, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft.

The reported crime rate tends to understate the total level of criminal victimization due to lack of detection and under reporting among crime.

# Retail Liquor Licenses

Indicator 1.5

Section I:  
Community  
Domain

Alcohol  
Availability

Table 1.5.1  
Total Retail Liquor Outlets per 100,000 Total Population

	1994	1995	1996	1997	1998	1999
Total Liquor Licenses	433	476	478	518	561	602
Total Population	116,800	117,800	119,000	121,200	122,600	124,200
Annual Rate	370.7	404.1	401.7	427.4	457.6	484.7

Table 1.5.2 1997-1999 Comparisons Three Year Average Rates

California	9.3	5.3	8.9	8.4	8.6	9.1

**Source:**  
CA Health and Human Services Agency,  
CA Department of Alcohol and Drug Programs

### Data Notes & Limitations

Admission rates do not account for the utilization of services provided outside of the publicly-funded alcohol and drug treatment and recovery system.

Admission rates are directly linked to program capacity and treatment demand, and are consequently, less useful as measures of overall prevalence of substance abuse in the general population.

# Hospital Discharges for Alcohol & Drug Disorders

Indicator 1.11

Section I:  
Community  
Domain

Adult Alcohol  
& Other Drug  
Use

Table 1.11.1  
**Hospital Discharges for Alcohol & Drug Related Causes and Rate per 100,000 Population**

	1994	1995	1996	1997	1998
Total Discharges	501	468	512	513	502
Total Population	116,800	117,800	119,000	121,200	122,600

**Annual State & County Comparisons 1994-1998**

	1994	1995	1996	1997	1998
Napa	428.9	397.3	430.3	423.3	409.5
California	168.8	170.7	173.1	168.9	164.4

**Source:**  
CA Health & Welfare Agency,  
Department of Alcohol & Drug Programs

*Data Notes & Limitations*

*Hospital discharge rates only include discharges for diagnoses directly attributable to alcohol and drug use. The measure excludes cases where the onset of disease may partially attributable to substance use behaviors.*

**AIDS Incidence**

Indicator 1.12

Table 1.12.1  
**Total Number of AIDS Cases  
and Rate per 100,000 Population**

	1994	1995	1996	1997	1998	1999
Total AIDS Cases	17	17	8	7	6	3
Total Population	116,800	117,800	119,000	121,200	122,600	124,200
Rate per 100,000	14.6	14.4	6.7	5.8	4.9	2.4

California	13.6
County Cluster Urban "C"	7.9
Statewide Ranking	21st

Table 1.12.3  
**Annual State & County Comparisons  
1994-1999**

	1994	1995	1996	1997	1998	1999
Napa	14.6	14.4	6.7	5.8	4.9	2.4
California	32.5	29.2	22.3	16.3	12.6	11.9

**Source:**  
CA Health & Welfare Agency,  
Department of Health Services,  
Office of AIDS

*Data Notes & Limitations*

Data was not available for counties with fewer than two reported cases; to allow for rate calculations, a value of one has been substituted for counties with unavailable data.

The number of reported AIDS cases represents the total number of cases caused by both intravenous drug use and other modes of transmission.

## Deaths Due to Alcohol & Drug Use

Indicator 1.13

Section I:  
Community  
Domain

Table 1.13.1

### Deaths Due to Alcohol & Drug Use and Rate per 100,000 Population

	1994	1995	1996	1997	1998
Total Deaths	71	73	71	63	61
Total Population	116,800	117,800	119,000	121,200	122,600

California	8.6	8.5	8.2	6.9	1.4	5.1

**Source:**  
CA Health & Welfare Agency,  
Department of Social Services,  
Statistical Services Bureau

### Data Notes & Limitations

The Temporary Assistance to Needy Families (TANF) program replaces the former Aid to Families with Dependent Children (AFDC) cash assistance program. Caseload data prior to 1997 is not comparable to current figures.

The number of persons receiving TANF benefits is estimated using a one-month sample caseload; caseloads may vary from month-to-month within the reporting year.

**Domestic Violence**

Indicator 2.2

Table 2.2.1  
**Domestic Violence Calls for Assistance and Rate per 100,000 Population  
Ages 18-69 Years**

	1994	1995	1996	1997	1998	1999
Domestic Violence Calls	663	691	540	522	372	385

# APPENDICES

---

Appendix A  
**Listing of County Clusters and Description of Demographic Characteristics**

Cluster		Description
<b>Urban "A"</b>		
Fresno Imperial Kings Los Angeles	Merced Monterey Tulare	Largely urban, with small (1%) to moderate (31%) rural populations; above average poverty levels; race/ethnically diverse with prominent Hispanic populations approaching or exceeding a majority in several counties; low educational attainment among residents of most counties (noted exceptions are Los Angeles and Monterey counties); youth populations account for above average percentage of total county population
<b>Urban "B"</b>		
Alameda Contra Costa Orange Sacramento San Diego San Francisco	San Mateo Santa Clara Solano Ventura Yolo	Predominantly urban, with zero to eleven percent of total populations living in rural areas; low or average rates of poverty; race/ethnically diverse with largest Black and Asian populations; highest educational attainment on average across county subgroups; youth account for lower than average proportion of total population
<b>Urban "C"</b>		
Butte Marin Napa Placer	San Luis Obispo Santa Cruz Sonoma	Largely urban, with small (7%) to moderate (34%) rural populations; lower than average poverty (excluding Butte county); predominantly White, with small (9%) to moderate (26.8%) Hispanic populations and smaller than average Black, Asian, and Native American populations; youth account for lower than average proportion of total population.
<b>Urban "D"</b>		
Kern Riverside San Bernardino San Joaquin	Santa Barbara Stanislaus Sutter Yuba	Largely urban, with small (6%) to moderate (28%) rural populations; average to above average poverty rates; race/ethnically diverse with moderate to large Hispanic populations and larger than average Black and Asian populations; low levels of educational attainment among county residents (excluding Santa Barbara county); youth populations account for above average percentage of total county population.
<b>Rural "E"</b>		
Colusa Glenn	Madera San Benito	Largely rural, with 48 to 72 percent of the population living outside of urban areas; higher than average poverty rates (excluding San Benito); predominantly White (50.8%) and Hispanic (42.1%), with Blacks, Asians, and Native Americans accounting for less than five percent of the total population; very low levels of educational attainment; youth populations account for above average percentage of total county population.
<b>Rural "F"</b>		
El Dorado Humboldt Inyo	Mono Shasta Trinity	Largely rural, with 45 to 72 percent of the population living outside of urban areas; low to above average poverty rates; lower than average levels of educational attainment among most counties; predominantly White (81.7%) with small minority Hispanic (9.3%) and Native American (4.1%) populations; Blacks and Asians account for less than two percent of the total population across counties.
<b>Rural "G"</b>		
Amador Del Norte Lake Lassen Mendocino	Modoc Nevada Siskiyou Tehama Tuolumne	Comparable demographic composition to Subgroup 6 with proportionately larger rural populations
<b>Rural "H"</b>		
Alpine Calaveras Mariposa	Plumas Sierra	Predominantly rural, with 70 to 100 percent of population living outside of urban areas; race/ethnically homogenous, with small minority Hispanic (7%) and Native American populations (4.8%); Blacks and Asians together account for one percent of the total population; lower than average educational attainment among county residents.
